

SCOUT PRO and Adventurer Pro models

Setup: Automatic shut off must be OFF.

Units: grams should be ON.

Print: Stable printing must be OFF and Auto-Print must be OFF.

USB: must be turned to ON

-baud rate at 2400

-Parity to 7-NONE

-Handshake to NONE

To get into the menus, turn the unit off. Make sure the switch on the bottom of the balance is in the unlocked position. The switch must be left in the unlocked position for the USB connection to remain active. Press and hold down the "On" button while it is booting: you'll see the word "MENU" displayed. Release the button and it will say "CAL". Use the "Print" button to move through menus and the "On" button to select, (so to disable Automatic Shutoff in Setup, Press "Print" until "SEtUP" appears, press "On" to get into the Setup Menu, the first option is "A-OFF", press "On" to select that. If it says "OFF" you are good, press "On" to select that, but if it says "On", press "Print" so that it says "OFF", then press "On", then you are back to "A-OFF", press "Print" a couple times until it says "End" and then press "On" and you'll be out at the "SEtUP" menu, (so press "Print" to go into "Unit" to set/check the second setting and so on..)
