

# Sci-Voice™ Talking LoggerPro

The original data collection and analysis science access solution from Independence Science that has the statistical power you need for your laboratory.

Perform scientific data collection, sensor calibration, and analysis with Vernier Software & Technology probes directly on your Windows PC. Seamlessly transfer your data to Microsoft® Word, Excel, and text documents. Emboss **Braille**-labeled tactile diagrams of your data trends directly from the software application.

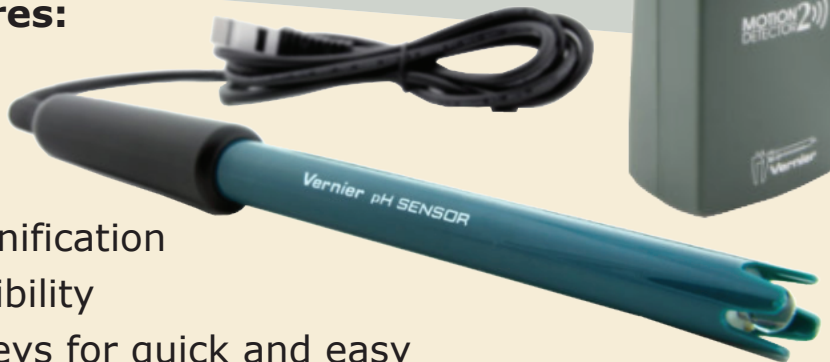

*Sci-Voice Talking™ LoggerPro interfaces with the Sci-Voice™ Talking LabQuest.*

## The package includes:

- One LabQuest Mini: USB sensor hub device
- Five sensors (Light, PH, Temperature, Motion, Relative Humidity)
- One single-user JAWS Logger Pro plug-in
- One LoggerPro software site license

## Highlighted Accessibility Features:

- Audio graph sonification
- Data table navigation
- Embedded talking timer
- Sensor calibration using audio sonification
- ViewPlus Tiger embosser compatibility
- JAWS/LoggerPro navigation hotkeys for quick and easy access to data collection and analysis tools
- Free LoggerPro software upgrades available from Vernier Software & Technology

**Note:** This package requires a full license of the Job Access with Speech (JAWS)®.

Serial number for JAWS license must be provided at time.
